Why do we need a Career Test?

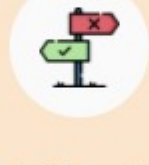

Majority of students in today's world choose their careers because one of the following reasons :-

- "My friend has chosen the same stream"
- "My Relative took this same course and now he is earning in lakhs"
- "My Parents want me to do this"
- "I think this might be good for me"
- And many other reasons like this without having proper understanding of your interest, personality and proper guidance.

What does this test mean?

- This test will identify the interest and personality of the student which also helps in identifying the strengths, weaknesses, motivations and dislikes of the student.
- Then connect with a Mentor and understand which careers would be the most ideal for the student according to their personality and interests and also understand the pros and cons of all those careers by using our career hub whose full access is also included in this test.
